What	Tool	Result	WCAG 2.1 level																																																						
Page title	manual	There is only one title.	AA																																																						
Color contrast or color ratio	<a href="https://webaim.org/resources/contrastchecker/">https://webaim.org/resources/contrastchecker/</a>	16.1:1	AA																																																						
Image text alternatives	manual	They are 86 img, but only 14 with attribute alt	A																																																						
Resize text	manual	If you change the web dimension, the text change	AAA																																																						
Forms, labels and errors	manual, web development console	It's failed to load some js scripts	A																																																						
Basic structure check	manual	It 's html5. There are header, nav, footer...	AAA																																																						
What	Tool	Result	WCAG 2.1 level																																																						
Page title	manual	There is only one title	AA																																																						
Color contrast or color ratio	<a href="https://webaim.org/resources/contrastchecker/">https://webaim.org/resources/contrastchecker/</a>	14.15:1	AA																																																						
Image text alternatives	manual	There are 12 img, 9 have attributes alt	AAA																																																						
Resize text	manual	The text resize good.	AAA																																																						
Forms, labels and errors	manual, web development console	There are many errors.	A																																																						
Basic structure check	manual	There are header, nav, footer. Because of this, it's html5	AAA																																																						

<b>Results and Recommended Actions</b>  I really love this website, it's dynamic, attractive and visually beauty. The only problem it's the alt's in the img. There are very few.  The font-size is perfect. you can read it easily.  This site apperas to meet WCAG 2.1 AA	<b>Results and Recommended Actions</b>  I would like change the font-size it's only 17px, you can read it, but for me, it's little font-size.  I like the structure, the colors combination and some emojis.  This site appears to meet WCAG 2.1 AA
